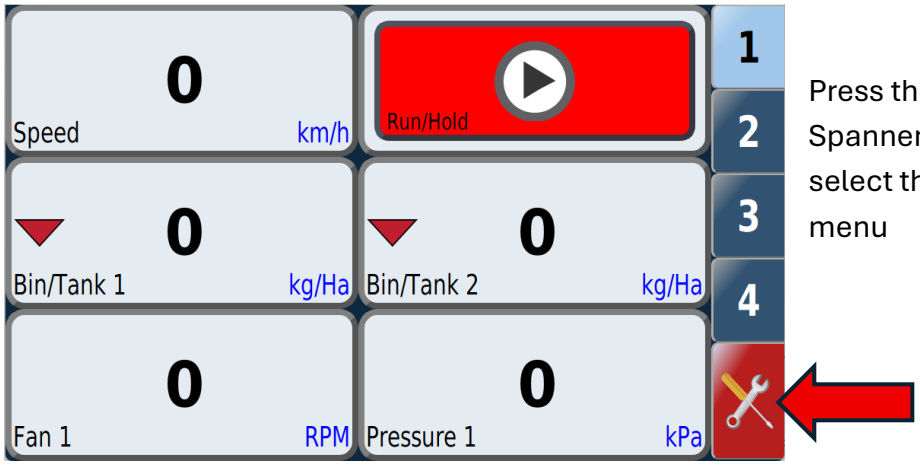
How to Hotspot to 7000PRO screen to Phone

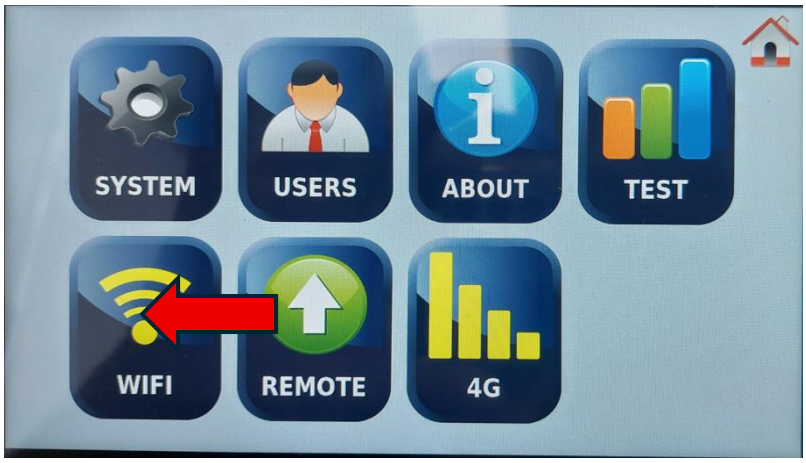
Power up 700PRO screen

Go to your phone and set up as a mobile hotspot

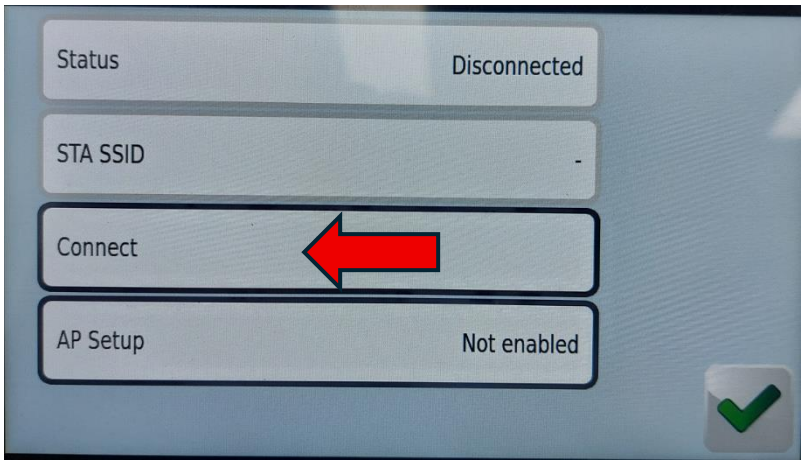


Press the Spanner/Screwdriver to select the Maintenance menu

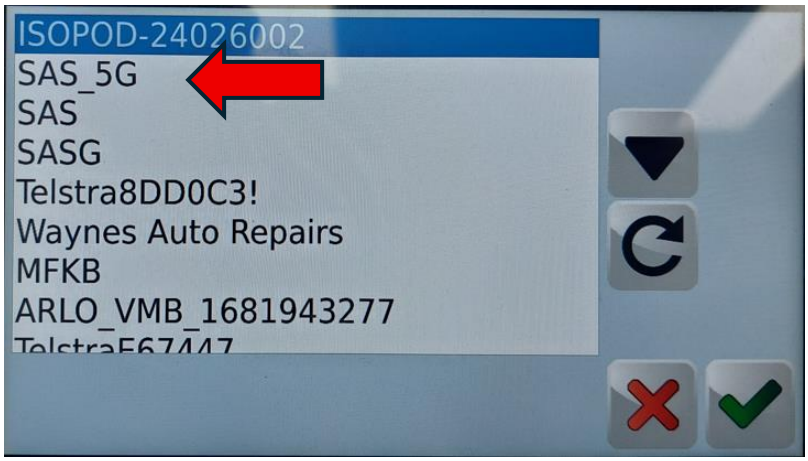
Press the Toolbox to enter



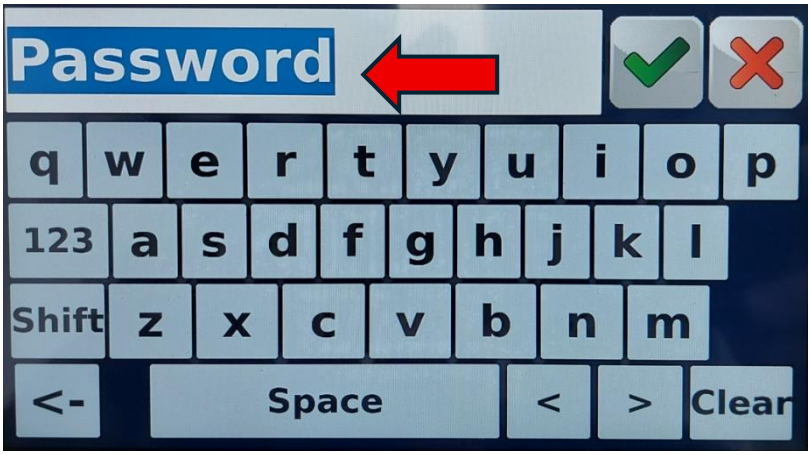
Press WIFI



Select the connect tile and it will provide you with a list of WIFI signals available.

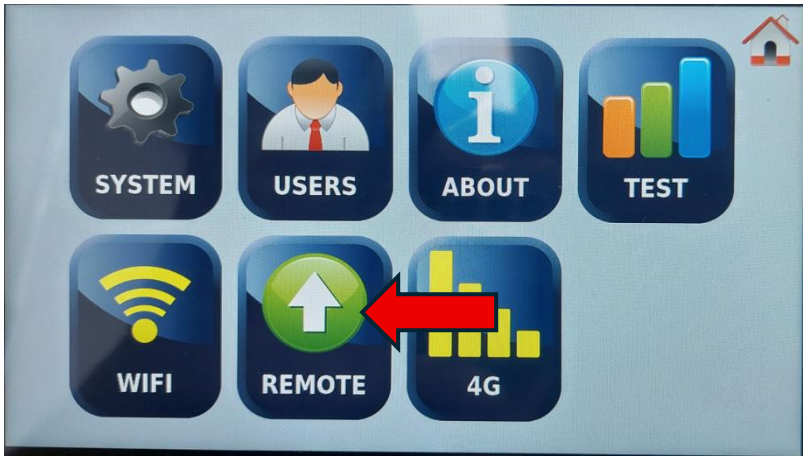


You should be able to select your WIFI hotspot

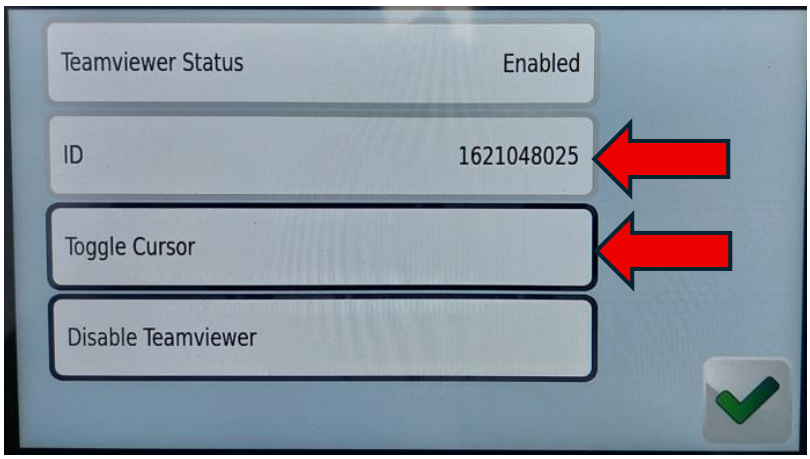


Type in your phone's hotspot password.

Press the green tick to exit this page.



Then press the remote tile,



This will display an ID number, please tell the person who is trying to connect into your screen.

Once you see him connected, press the toggle cursor tile.
